

PULPIT project (in a nutshell)

Public and Patient Involvement in Interprofessional Education of Undergraduate Healthcare Students

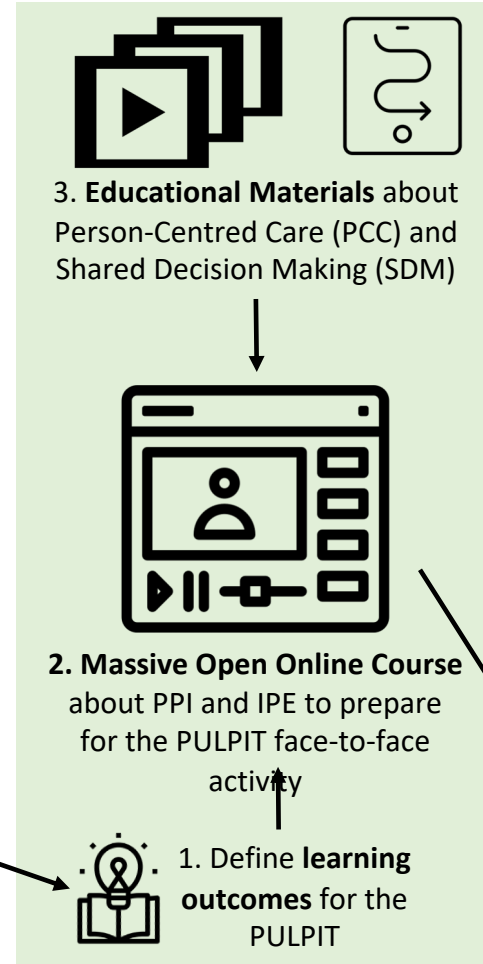

General Objective: To foster the active and properly prepared Public and Patient involvement (PPI) in the education of undergraduate healthcare students, in the classroom, promoting an interprofessional (IPE) person-centred care discussion about the physical, mental and social impact of illness.

WP5 – Dissemination, Outreach and Sustainability

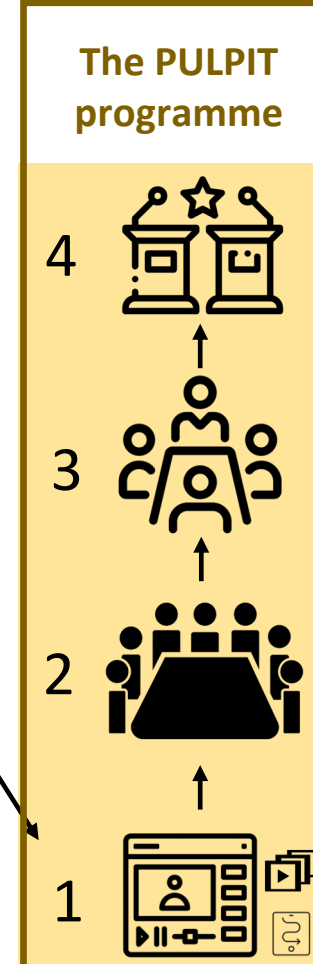

National and International meetings and conferences. Train-the-trainer. Social media & Website. PULPIT champions.

WP2 - International recommendations for PPI and IPE of undergraduate healthcare students

WP3 – Co-development of the PULPIT educational products

WP4 - Development and validation of the PULPIT programme (4 wks)
(2 in Portugal, 1 in Belgium, 1 in the Netherlands, 1 in Slovenia)

The students develop a collaborative health management plan and present it to all group for discussion

Each PEP receives 3 students at a place of his/her choice to discuss the **"Physical, mental and social implications of chronic illness"**

The PULPIT programme is presented by the Professors/Facilitators to all group, setting up the "rules of function" for the educational activity.

In each country, 8-12 students (dif. professions), 4 Patient Education Partners (PeP) and 2 professors volunteer for the PULPIT programme and start with the **MOOC** (including PCC educational materials)
